No More Lifts, No More Steps

Arboc Mobility - Booth 2269

Providing low-floor technology below 30', Arboc

Mobility will be exhibiting its Spirit of Mobility; the Spirit of Freedom model, designed as a simple low-floor for small transit and private op-

erators;
and now

the Spirit of Liberty that will revolutionize the low-floor market.

The Spirit of Mobility is a VTM parallel electric hybrid, available with gas or diesel power. No plug-in charging is required and it features totally automatic operation. Other features include: 20 to 35 percent fuel and emissions improvement; automatic rotor decoupling for zero drag on the highway; 400 lb ft of available torque up to 30 MPH; low voltage (96 volts) for increased safety; manual disconnect switch for first responders; and more.
