2013 PRODUCT
GUIDE

ARBOC Specialty Vehicles Offers a Full Line of Low Floor Buses

ARBOC Specialty Vehicles is the undisputed leader in low floor technology featuring a full line of low floor buses for fleet, transit and private operators.

Products include the *Spirit of Mobility*, built on a conventional GM cutaway with all passengers entering through the same 39 inch wide door opening with a beneficial kneeling feature allowing for an entrance of less than 5" from the curb without deploying the ramp.

Improvements to the Spirit of Mobility include a quieter, smoother operating kneeling feature, improved loading and un-loading options, and a simplified air suspension maintenance system.

Next, the *Spirit of Freedom* utilizes only General Motors standard suspension to create a low-floor, ADA compliant bus capable of 1:6 ramp angle; all with an exceptional ultra-low price point. With the spacious 41" entry opening and low step height, makes this an ideal bus for airport, hotel, and resort shuttles, as well as transit agencies.

Utilizing the GM suspension has the added benefit of impressively driving down maintenance costs over the whole life cycle comparable to any simple cutaway.

Third is the *Spirit of Liberty* a low-floor, medium duty 29 - 33ft rear engine bus, available in late 2013.

The Liberty features an open floor-plan with no steps throughout the passenger area. Standard wheelchair zones are a spacious 54 x30 inches minimum. Passengers enter on a 34-inch wide, 1:6 ramp by Braun (rated at 1,000 lbs., an industry best) or Ricon (rated at 800 lbs.) to a 40 inch pass-through between front wheelhouses. The Liberty has the capacity to carry up to 37 passengers plus 15 standees.

Spirit of Freedom[®]

BY ARBOC Specialty Vehicles

PATENT 7,802,801, PATENT 8,371,589 PATENT PENDING

STURAA TEST 5YEAR/150,000 miles

At last, a low floor bus with a conventional GM suspension at an affordable price. Maintenance like any other cutaway but low floor. The **Spirit of Freedom** is ideal for parking, airport, hotel, or car rental shuttle. With the 1:6 angle optional ramp it is a must for small transit operations because of the maintenance and cost. ARBOC SV is dedicated to the continuous improvement in the future of low floor buses today.
